

Hello!

Thank you for purchasing my product.

You have the following files:

- TabuFont-Black.otf
- TabuFont-Black.ttf
- TabuFont-Decorative.otf
- TabuFont-Decorative.ttf
- TabuFont-Symbols.otf
- TabuFont-Symbols.ttf
- Chart with all symbols

Please let me know if you have any questions: **struvictory@gmail.com** or send me PM.

If you like my work, please follow me on Instagram: www.instagram.com/struvictory.art/

I'm interested to see the results of your work with my font: you can mail me or tag **@struvictory.art** in Instagram.

I wish you success in your work! Thank you and have a nice day!

How to Install Fonts on Windows 7-10

1. Double-click the font file to open the *Font Preview window*. This will allow you to see how the font looks on your screen. The font file may not show the extension, but it should have an icon of a piece of paper with a small "A" on it. You'll need to have removed the font file from the ZIP file before you can open it in Font Preview.
2. Click the *INSTALL* button to install the font. The button is located at the top of the Font Preview window. You can also right-click on the font file or multiple font files at once and select "Install".
3. After installation close the *Font Preview window*.

How to Install Fonts on Mac OS

1. Unzip or extract the fonts from their ZIP files.
2. Double-click on the font file. This will open the Font Book where you can preview the font. You can also open the *Font Book* manually from the Applications folder. You can use the menu at the top of the window to see how the font will appear with various style changes, such as bold or italic.
3. Click Install Font. This will add it to your font list in documents and other programs. You can also install fonts by opening the *Font Book*, clicking File, and then selecting Add Font.
